Farmer Cooperative Statistics 1982

FARMER COOPERATIVES IN THE UNITED STATES
COOPERATIVE INFORMATION REPORT 1
SECTION 27

9997862

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL COOPERATIVE SERVICE

Abstract

FARMER COOPERATIVE STATISTICS, 1982 by Ralph M. Richardson, Celestine C. Adams, Katherine C. DeVille, Frances E. Mahan, Elizabeth J. Simmons, and John W. Stutzman, Cooperative Management Division, Agricultural Cooperative Service, U.S. Department of Agriculture.

A survey of U.S. farmer cooperatives for calendar year 1982 showed a decrease in total business volume as well as a continuing decline in number of organizations and memberships. Total gross business and total net business volume are reported for 6,125 cooperatives. Business volume, number of cooperatives, and cooperative memberships are reported by commodity for those cooperatives classified as marketing, farm supply, and related service. A 10-year comparison shows changes in cooperative members, business size, sales volume, and share of marketing and purchasing activity. Data on balance sheet and net margins and selected activities of other service organizations are presented.

Key words: cooperatives, statistics, business volume, memberships, balance sheet, net margins.

Cooperative Information Report 1 Section 27

March 1984

Preface

Farmer cooperative statistics are collected annually to provide information on the progress and trends in cooperatives' growth and development. Many people use these statistics for various purposes such as research, technical assistance, education, planning, and public policy. Acquiring, analyzing, and disseminating farmer cooperative statistics are authorized by the Cooperative Marketing Act of 1926.

This report provides aggregate information on the number, membership, and business volume of farmer cooperatives classified by commodity and functional type. Both gross (includes intercooperative business) and net (excludes intercooperative business) dollar volumes of cooperatives are shown.

Basic information is provided on the balance sheet and net margins of farmer cooperatives by principal product marketed and major functional type.

Statistics for 1982 are presented on a national basis only. Therefore, to provide detailed information on farmer cooperatives, data for 1981 are shown where 1982 data are not available.

Data are collected from individual farmer cooperatives by mail survey of organizations identified by Agricultural Cooperative Service (ACS), as meeting the requirements of the ACS definition of a farmer cooperative.

A stratified random sample of a large proportion of farmer cooperatives is used to reduce the work of collecting and assembling data and to enable more timely publishing of statistics.

ACS depends on the cooperative community's response to its annual survey to develop a detailed and comprehensive set of statistics on farmer cooperatives. The time and effort taken to provide information and the rapidity with which it is furnished are greatly appreciated.

Readers wishing earlier statistics on farmer cooperatives by U.S. dollar volume totals for detailed farm products marketed and farm supplies handled, beginning in 1950-51, may send their requests to: Agricultural Cooperative Service, U.S. Department of Agriculture, 201 14th St., S.W., Room 3300, Auditor's Building, Washington, D.C. 20250.

Highlights

The 1982 survey of marketing, farm supply, and related service cooperatives showed a decline in business volume as well as a decrease in number of memberships and organizations.

Total gross business volume (including intercooperative business) handled by cooperatives amounted to \$95.1 billion. This was a decrease of 6.3 percent from the \$101.5 billion reported in the previous year.

Total net business, excluding business done between cooperatives, amounted to \$69.2 billion, down 3.3 percent from the \$71.5 billion in 1981.

The total number of farmer cooperatives dropped from 6,211 in 1981 to 6,125, a net decrease of 86 associations. Each year, new cooperatives are formed and others disappear as they go out of business due to consolidation, merger, acquisition, or unsuccessful operations.

Cooperative memberships of 5,335,418 in 1981 dropped to 5,135,774, a decrease of 3.7 percent.

The gross value of farm products marketed by cooperatives amounted to \$65.6 billion in 1982, a decrease of 6.5 percent from the gross volume of \$70.2 billion for 1981. The net value of these farm products, after eliminating duplication resulting from intercooperative business, amounted to \$51.4 billion, a 3.5-percent decrease from the \$53.3 billion marketing net for the previous year.

The gross value of farm supplies handled by farmer cooperatives amounted to \$28.1 billion in 1982, decreasing 6.7 percent from the \$30.1 billion in 1981. The net value of these supplies, after intercooperative business was eliminated, amounted to \$16.4 billion, 4.1 percent below the \$17.1 billion in 1981.

Receipts for services related to marketing farm products and handling farm supplies amounted to \$1.4 billion, an increase of 17.1 percent above the 1981 volume of \$1.2 billion.

Combined assets for all farmer cooperatives totaled \$28.6 billion, down 1 percent from the \$28.8 billion for 1981. Net assets, after eliminating intercooperative investments, were \$25.8 billion in 1982, compared with \$26.3 billion in 1981—a 1.7-percent decrease.

Total liabilities were \$17.4 billion in 1982—down 2.9 percent from \$17.9 billion reported in 1981.

Net worth, or member and patron equity, increased 2.2 percent from \$10.9 to \$11.2 billion. Member and patron equity financed 39.1 percent of total assets in 1982, up from 37.9 percent in 1981.

Farmer cooperatives' net margins were more than \$854 million, a 40.7-percent decrease from the \$1.4 billion in 1981. The \$854 million included intercooperative dividends and refunds of \$294 million—down 47.3 percent from \$558 million in 1981.

Elizabeth J. Simmons, and John W. Stutzman*

Definition of a Farmer Cooperative

For inclusion in the annual survey, a cooperative is defined as one that meets the following requirements:

(1) Farmers or agricultural producers hold the controlling interest in the cooperative; (2) no member of the cooperative is allowed more than one vote because of the amount of stock or membership capital owned *or* the cooperative does not pay dividends on stock or membership capital in excess of 8 percent a year, or the legal rate in the State, whichever is higher; and (3) the cooperative does not deal in products of non-members in an amount greater in value than it handles for its members.

This definition may result in showing a larger or smaller number of farmer cooperatives than found in lists or directories of State agencies or cooperative councils. Agricultural Cooperative Service (ACS) includes only marketing, farm supply, and related service cooperatives on its list. Livestock shipping associations and wool pools are included as marketing cooperatives. Many State lists include other types of cooperatives such as production, credit, telephone, electric, and consumer cooperatives as well as those that do not fulfill ACS's definition. Another reason for differences in the count or number of cooperatives is that cooperatives may operate in a specific State for a considerable period of time before they are included in the national survey. This may be due to one of the following reasons: (1) ACS may not learn of the existence of the cooperative immediately; (2) the cooperative may not have completed and returned the initial questionnaire; or (3) no notification is received of a cooperative that quits operating.

Readers who wish to make comparisons from year to year in specific commodity groups, therefore, should keep in mind the differences in lists and classifications in State and Federal data.

Classification of Cooperatives

Statistics are presented according to a cooperative's major function, or classification, such as marketing, farm supply, and related service cooperatives. These classifications are defined as follows:

Marketing cooperatives are associations whose primary business is marketing farm products for members—that is, more than 50 percent of total dollar volume was derived from the sale of members' farm products. Marketing cooperatives are further classified according to which major commodity of 13 classifications is predominant (in terms of dollar volume) in each association's business. If a cooperative consistently indicates it is handling a larger volume of a commodity than the one it was originally organized to handle, and which provided the basis for its initial classification, it is reclassified by the commodity currently representing the predominant product in its business volume.

Cooperatives first furnished data by individual commodities handled and services performed in the 1950-51 survey.¹ Cooperatives operating on a multistate basis were asked to furnish information on memberships and business volumes for the individual States they served. Before that time, all memberships and business were credited to the States in which each association maintained its headquarters.

Farm supply cooperatives are those whose farm supply business accounted for more than 50 percent of total dollar volume.

Farm supply cooperatives include those handling all types of farm production supplies and equipment such as feed, seed, fertilizer, petroleum products, farmstead equipment, and building supplies. Some also handle items such as heating oil, lawn and garden equipment, and food.

Major functions of *related service* cooperatives are trucking, storing, drying, or similar services related to marketing or farm supply activities.

Many cooperatives handle more than one commodity and provide both marketing and farm supply facilities, as well as facilities and equipment to perform related services such as storing, drying, and trucking. These associations are classified according to the predominant commodity or function as indicated by their business volumes.

Other types. Additional data on the number, participation, and activity of service cooperatives or organizations such as rural electric cooperatives, production credit associations, rural credit unions, and dairy herd improvement associations are summarized.

¹ A detailed discussion of the revisions initiated in statistical methods in 1950-51 was given in *Statistics of Farmers' Marketing, Purchasing, and Service Cooperatives, 1950-51*, U.S. Dept. Agri., Farm Credit Admin., Misc. Rpt. 169, pp. 1-3.

Organizational Structures

Centralized

Most farmer cooperatives are centralized organizations. Individual farmers make up the membership. These 5,929 centralized cooperatives usually serve a local area or community, county, or several counties. Most local associations usually perform a limited number of the first steps of marketing. In farm supply associations, practically all sales are at the retail level. A few centralized cooperatives operate over large geographic areas and have members in several States. They often provide more vertically integrated services such as processing farm products or manufacturing feed and fertilizer.

Bargaining associations usually have centralized organizational structures. These associations derive all or a major portion of business volume from negotiating with distributors, processors, and other buyers and sellers over price, quantities, grade, terms of sale, and other factors involved in marketing farm products; only a few bargain for the purchase of farm supplies. While the primary function of such an association is to bring buyers and sellers together to contract for the sale of members' products, many bargaining associations now perform additional functions. For example, dairy bargaining associations at one time generally performed only price negotiation. Now, many perform additional functions, such as physically handling a portion of the milk and making spot sales for their patrons. Bargaining associations, like other dairy marketing cooperatives, represent their members at Federal or State milk marketing order hearings.

Federated

Federated cooperatives comprise two or more member associations organized to market farm products, purchase production supplies, or perform bargaining functions. Member associations often operate at points quite distant from federation headquarters. One hundred eleven federated cooperatives have been identified. Individual farmers are not members of strictly federated associations, rather, they are members of cooperatives that comprise the federation—sometimes called a regional cooperative. Also, some federations are made up of regional cooperatives—often called interregional associations.

Mixed

A small number of cooperatives have both individual farmer-members and autonomous cooperative members. Therefore, these associations are a combination of both the centralized and federated struc-

tures. Often, these cooperatives serve large geographic areas with members in many States and provide a variety of integrated services. Eighty-five cooperatives have been identified as having a "mixed" structure.

Ten-Year Comparison of Cooperative Growth

As cooperatives declined in number, they grew in size and increased their importance as purchasers of supplies and marketers of products for members. Business volume of farmer cooperatives nearly tripled in the decade between fiscal year 1973 and calendar year 1982.

Number of Organizations Declined

The total number of marketing, farm supply, and related service cooperatives declined from 7,854 in 1973 to 6,125 in 1982 (table 1 and fig. 1). The number of marketing cooperatives declined from 4,897 to 3,714 and farm supply cooperatives from 2,801 to 2,299. The number of service cooperatives declined from 156 to 112.

Figure 1

Farmer Cooperatives in the United States

*Total includes a small number of cooperatives that provide specialized related services.

¹For years before 1950-51, see appendix table 5, FCS General Report 128 in libraries.

²Previously, data for farmer cooperatives were reported on a fiscal year basis. Beginning in 1978, data are included for the calendar year. Data for 1978 are estimated.

³Preliminary.

Business Size Increases

Measured by annual gross business volume, farmer cooperatives increased in size. Although the majority of cooperatives remain small and primarily serve local areas, a growing minority are seeking regional, or even national, markets as a means of business growth and survival.

The increased size of individual cooperatives comes in part from mergers and consolidations. However, data used were not adjusted for changes in price levels and some size changes are due in part to inflationary effects.

In 1982, 8.8 percent of all farmer cooperatives reported business volumes of \$15 million or more, representing 77.8 percent of the total gross dollar volume. Farmer cooperatives with business volumes of \$200 million or more represented 56.1 percent of total sales compared with 45.1 percent in the 1976² fiscal period.

The 100 largest cooperatives (usually operating over large geographic areas) make up an important minority of farmer cooperatives. During 1976, the 100 largest cooperatives accounted for about \$31.5 billion, or 56.4 percent of total gross business volume. By 1982, the 100 largest cooperatives³ accounted for nearly \$58.5 billion in business volume, 61.5 percent of the total.

Business Volume Increases

Net cooperative business, unadjusted for changes in the price level, increased from \$26.2 billion in 1973 to \$69.2 billion in 1982 (table 2 and fig. 2).

During this 10-year period, marketing of farm products declined slightly from 75 to 74 percent of annual net business volume; purchases of production supplies rose from 23 to 24 percent; and related services remained about 2 percent.

Marketing volume increased from \$19.6 billion to \$51.4 billion, supplies purchased from \$5.9 billion to \$16.4 billion, and services provided from \$613 million to \$1.4 billion.

Grain, soybeans, and soybean meal and oil; dairy products; fruits and vegetables; and livestock and livestock products increased from 82 percent of all products marketed in 1973 to 85 percent in 1982.

²Comparable data not available for the 1973 fiscal period.

³Based on amount of annual gross sales (includes intercooperative sales) but without regard to size of assets.

¹Preliminary. Totals may not add due to rounding.

²The numbers are based on 1980 survey results due to sampling procedures used in 1981.

³Adjusted for duplication arising from multiple activities performed by many cooperatives.

⁴Charges for services related to marketing or purchasing but not included in the volume reported for these activities.

Figure 2

Business Volume of Farmer Cooperatives

In 1982, grain, soybeans, and soybean meal and oil accounted for a substantially greater proportion of total cooperative business than in 1973. Fruits and vegetables and livestock and livestock products accounted for substantially less. Dairy products showed a moderate decrease. Among lesser commodities, both poultry products and sugar products declined considerably.

In the farm supply group, three items—petroleum products, fertilizer, and feed—were especially important. They accounted for 72 percent of the total production supply business in 1973 and 75 percent in 1982.

Considering changes in the group, however, the proportion of dollar business volume accounted for by feed declined, while the proportion accounted for by fertilizer and petroleum products increased substantially. Farm chemicals also increased in proportion, while other production supplies showed little change.

Market Share Greater

Cooperatives accounted for about 23 percent of the agricultural products marketed at the first-handler level in 1973. This share increased to

30 percent in 1982.⁴ Market shares for individual commodities higher than the overall average were milk, sugar, rice, grain and soybeans, and cotton and cotton products.

Farmers in 1973 purchased 23 percent of the major farm supplies (fertilizer and lime, petroleum and products, farm chemicals, feed, and seed) at the first-handler level through cooperatives. This proportion increased to 27 percent, due mostly to larger volumes of farm chemicals and fertilizer moving through cooperatives. These production supplies and petroleum were handled in greater proportion than the overall average.

Number of Cooperatives

The 1982 survey accounted for 6,125 marketing, farm supply, and related service⁵ cooperatives, compared with 6,211 in 1981.

The decrease of 86 associations was 1.4 percent less than the number in 1981. The decline in number largely reflected a continuing trend involving merger, consolidation, acquisition, or dissolution.

Of the 6,125 cooperatives, 3,714 primarily marketed farm products, 2,299 handled farm production supplies, and 112 provided related services.

Comparison of 1982 with 1981 data shows that marketing cooperatives increased from 60.3 to 60.7 percent of the total number of cooperatives; farm supply cooperatives dropped from 37.9 to 37.5 percent; and related service cooperatives remained about 1.8 percent.

The percentage changes in table 1 are due to some extent to the reclassification of cooperatives because of changes in the function from which they derive the major portion of their dollar volume. The primary examples are marketing cooperatives whose major business became the sale of farm supplies, or farm supply cooperatives in which marketing took a dominant role.

In table 3, cooperatives are classified according to the business activity that consistently accounted for the largest percent of their dollar volume for 1981.

⁴Cooperative share was lower in 1982 compared to 1981 due to adjustments made for cooperative purchases beyond the first-handler level. Agricultural Cooperative Service, unpublished data.

⁵Related services include trucking, storage, grinding, drying, and similar services affecting the form, quality, or location of farm products and supplies handled by cooperatives. They do not include credit, electric, or telephone services not directly related to marketing or purchasing activities.

Footnotes to table 3.

¹Includes independent local cooperatives, federations, centralized cooperatives, and cooperatives with mixed organizational structures.

²Data covering operations of cooperatives for calendar year 1981.

³Cooperatives performing specific services related to a commodity are included. Incorporated local associations of a federation that performs the actual marketing or processing are counted.

⁴Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (There is some duplication in these membership figures because many farmers belong to more than one cooperative.) Totals may not add due to rounding.

⁵The cooperative with which this membership is affiliated has been counted in the State in which the cooperative maintains its headquarters. (Foreign members of U.S. headquartered cooperatives are in Canada and Mexico).

⁶Includes soybean marketing and processing.

⁷Membership of nut cooperatives that market peanuts fluctuates from year to year and is affected by the extent to which producers participate in price stabilization programs.

⁸Includes sugar, sugarcane, sugar beets, honey, maple syrup, molasses, and sorghum.

⁹Member-patrons. Number fluctuates considerably from year to year due to participation in price stabilization programs.

¹⁰No individual memberships or members located outside the State in which cooperative headquarters is located.

¹¹Includes forest products, hay, hops, nursery stock, coffee, and other farm products not separately classified.

¹²Cooperatives providing services related to marketing or purchasing activities.

Number of Memberships

Memberships in marketing, farm supply, and related service cooperatives totaled 5,135,774 in 1982, a decrease of 3.7 percent from the 5,335,418 memberships in 1981 (table 4 and fig. 3). The long-term trend has been one of decline, reflecting, in part, the decreasing number of farmers in the United States. Many farmers were members of more than one cooperative and each membership was counted. Total membership contains duplication that cannot be eliminated with current reporting methods.

Though many farmers maintained membership in more than one cooperative, more than 1.1 million members, or 22.4 percent, did not actively patronize their cooperatives.

Membership figures often vary widely from year to year for cooperatives participating in price stabilization programs, particularly for those handling cotton, peanuts, or tobacco.

Classification of members is affected also by the diversity of services offered by cooperatives. For example, a member may use a cooperative

Table 4— Memberships in predominantly marketing, farm supply, and related service cooperatives, selected years, 1950-51 to 1982

¹For years before 1950-51, see appendix table 6, FCS General Report 128 in libraries.

²Previously, data for farmer cooperatives were reported on a fiscal year basis. Beginning in 1978, data are included for the calendar year. Data for 1978 are estimated.

³Preliminary.

Figure 3

Memberships in Farmer Cooperatives

Million members

to market only one of the farm products handled by the cooperative, or a member may use a cooperative classified in the marketing group only for purchasing one or more types of production supplies. The member's business with the cooperative, therefore, may not be in the group that represents the cooperative's major business volume (which determines how the cooperative is classified in this report). The membership, however, will be included arbitrarily in that classification.

Business Volume

Total gross business volume of 6,125 marketing, farm supply, and related service cooperatives amounted to \$95.1 billion (table 5). This was a decrease of 6.3 percent from the \$101.5 billion gross reported in 1981.

Total net business volume of farmer cooperatives amounted to \$69.2 billion. This amount included \$51.4 billion for farm products marketed, \$16.4 billion for farm supplies purchased, and \$1.4 billion for services performed. The total net figure of \$69.2 billion, which excludes intercooperative business (the difference between gross and net business volumes), represented a decrease of 3.3 percent from the \$71.5 billion in 1981. However, discounting for price changes, real drop in business

volume was estimated to be 2.5 percent.⁶ Intercooperative business dropped to \$25.9 billion from \$29.9 billion in 1981.

Gross and net volumes of business for marketing, purchasing, and related service activities are shown in table 5 for selected years from fiscal 1951 through calendar 1982. Both gross and net volumes were less than 1981 totals.

Gross volume of farm products marketed by cooperatives decreased from \$70.2 billion in 1981 to \$65.6 billion, a decrease of 6.5 percent. The net volume of farm products marketed amounted to \$51.4 billion and accounted for 74.3 percent of the total net volume of cooperatives. The net marketing volume represented a decrease of 3.5 percent from the \$53.3 billion for 1981. Losses resulted primarily from decreases in the dollar volumes reported for grain, soybeans, soybean meal and oil.

Figure 4 illustrates the leading products marketed by cooperatives based on net marketing business volume. Grain, soybeans, and soybean meal and oil led with 35.4 percent of total net marketing volume, followed by dairy products and livestock products.

Gross volume of all farm supplies handled by cooperatives amounted to \$28.1 billion, a 6.7-percent decrease from the \$30.1 billion gross in 1981. The net farm supply volume of \$16.4 billion accounted for 23.7 percent of the total net business volume, a 4.1-percent decrease from the \$17.1 billion volume in 1981. Decreases in net volumes of petroleum products, feed, and fertilizer largely accounted for this decline.

As shown in figure 5, leading farm supplies handled by cooperatives in terms of net business volume were petroleum products, with 33.6 percent of the total, followed by fertilizer and feed.

Receipts for services performed by all types of cooperatives amounted to \$1.4 billion, a 17.1-percent increase from the 1981 service receipts. Service receipts represented 2 percent of total net business volume.

An estimated 69.9 percent of the 6,125 cooperatives, or 4,279 cooperatives, marketed farm products (table 6). Farm supplies were handled by 4,952 cooperatives, 80.8 percent of the total, while 4,608 cooperatives, or 75.2 percent of the total, performed one or more services related to farm product marketing and farm supply purchasing.

The 1981 estimated volume of farm products marketed and farm supplies purchased by cooperatives is shown by State in table 7.

⁶By deflating the volume of farm products handled by cooperatives in 1982 by indices of producer prices for farm products and processed foods and feeds and the volume of farm supplies and related services by the index on prices paid by farmers for production of all commodities excluding interest, taxes, and wage rates, total business volume amounted to \$69.8 billion—only a 2.5-percent decrease from the 1981 volume.

Table 5—Business volume of marketing, farm supply, and related service cooperatives, selected years, 1950-51 to 1982

¹For years prior to 1950-51, see appendix table 7, FCS General Report 128, in libraries. Data for prior years are not entirely comparable due to revisions in statistical procedures in 1950-51.

²Services related to marketing or supply purchasing but not included in the volumes reported for these activities.

³Previously, data for farmer cooperatives were reported on a fiscal year basis. Beginning in 1978, data are included for the calendar year. Data for 1978 are estimated.

⁴Preliminary.

Total business.....	56,125	100.0	95,098,614	100.0	69,150,336	100.0

¹Preliminary. Totals may not add due to rounding.

²The numbers are based on 1980 survey results, due to sampling procedures used in 1981.

³Number of cooperatives handling each commodity group is computed as a percentage of the total number of 6,211 active cooperatives listed.

⁴Includes coffee, forest products, hay, hops, seed marketed for growers, nursery stock, other farm products not separately classified, and sales of farm products not received directly from member-patrons.

⁵Because many cooperatives do more than one type of business, these totals are fewer than the number obtained by adding the number of cooperatives handling individual items or performing individual services.

⁶Includes plant equipment, automotive supplies, hardware, chicks, and other supplies not separately classified.

⁷Charges for services related to marketing or purchasing but not included in the volume reported for those activities.

See next page for footnote references.

Footnotes to table 7.

¹Data covering operations of cooperatives whose business years ended during the 1981 calendar year. Includes independent local cooperatives, federations, centralized cooperatives, and cooperatives with mixed organizational structures. The volume of products marketed is allocated to the State in which they originate and the volume of farm supplies is allocated to the State in which they are sold; service volume is allocated to the State of origin when services relate to farm products marketed or to the State of destination when related to farm supplies sold.

²Gross business volume includes sales between cooperatives. Net business volume excludes sales between cooperatives. Totals may not add due to rounding.

³Dollar volume is not shown to avoid disclosing operations of individual cooperatives.

⁴Includes value of farm products imported, farm supplies exported, services related to imported farm products or exported farm supplies, sales to domestic military installations, or sales of farm products not received directly from member-patrons.

⁵Included in dollar volume of California.

⁶Includes forest products, hay, hops, nursery stock, coffee, and other farm products not separately classified. Also includes manufactured food products and resale items marketed by cooperatives.

⁷Includes automotive supplies, hardware, chicks, and other supplies not separately classified.

⁸Receipts for services related to marketing and purchasing activities but not included in the volumes reported for these activities.

Balance Sheet

Combined assets for all farmer cooperatives totaled \$28.6 billion in 1982, down 1 percent from the \$28.8 billion for 1981 (table 8). Assets of cooperatives, eliminating intercooperative investments, were \$25.8 billion in 1982 compared with \$26.3 billion in 1981, a 1.7-percent decrease.

Total liabilities were \$17.4 billion in 1982, down 2.9 percent from the \$17.9 billion reported in 1981. Net worth, or member and patron equity, was 11.2 billion, up 2.2 percent from the \$10.9 billion net worth for 1981. The proportion of total assets financed by equity went up from 37.9 to 39.1 percent.

Of the \$28.6 billion in total assets, marketing cooperatives accounted for nearly \$17.2 billion, 2.2 percent more than the \$16.8 billion for 1981 (table 9). Cooperatives whose principal products were grain, soybeans, and soybean meal and oil had total assets of nearly 6.6 billion in 1982 and \$6.7 billion in 1981, a 2.2-percent decrease. These cooperatives also maintained the largest proportion of investment in other cooperatives in both 1982 (16.5 percent) and 1981 (13.3 percent).

Assets of marketing cooperatives, excluding investments in other cooperatives, were \$15.7 billion. This compares with \$15.5 billion reported in 1981.

Table 8—Selected balance sheet data for farmer cooperatives by principal products marketed and major function, 1982

Principal products marketed and major function	Cooperatives ¹	Total assets	Total liabilities	Net worth
	<i>Number</i>		<i>1,000 dollars</i>	
Products marketed:				
Cotton and cotton products	437	1,292,746	789,189	503,557

Combined total	6,125	28,552,732	17,393,553	11,159,179

¹Many cooperatives are multiproduct and multifunctional in operations and are classified according to predominant commodity or function indicated by business volume.

²Includes dry edible beans and peas, nuts, tobacco, and miscellaneous products.

Farm supply cooperatives had total assets of more than \$11.3 billion in 1982, compared with \$11.9 billion in 1981. Excluding intercooperative investments, assets amounted to \$10 billion in 1982, down 5.8 percent from 1981.

Current and term liabilities of marketing cooperatives totaled nearly \$10.5 billion in 1982, compared with nearly the same amount in 1981. This represented more than half (60.1 percent) of total liabilities for all cooperatives in 1982 as well as in 1981 (58.5 percent). Grain marketing cooperatives showed nearly \$3.5 billion, a 7.5-percent decrease from 1981. Combined liabilities financed 60.9 percent of total cooperative assets.

Net worth or member and patron equity for all marketing cooperatives totaled nearly \$6.7 billion in 1982 and \$6.3 billion in 1981. Marketing cooperatives again maintained more than half the total (60 percent), while farm supply cooperatives accounted for 39.8 percent. The highest percent of total assets represented by net worth for all marketing

Table 9—Assets of farmer cooperatives by principal products marketed and major function, 1982

Principal products marketed and major function	Assets from own operations	Investments in other cooperatives	Total assets	Investments in other coops as percent of total
	-----1,000 dollars-----			Percent
Products marketed:				
Cotton and cotton products	1,203,223	89,523	1,292,746	6.9
Dairy products	3,545,649	285,941	3,831,590	7.5

Combined total.....	25,801,840	2,750,892	28,552,732	9.6

¹Includes dry edible beans and peas, nuts, tobacco, and miscellaneous products.

cooperatives (52 percent) was for cooperatives primarily marketing livestock, wool, and products. The lowest percent (27.1 percent) was for cooperatives primarily marketing poultry products. Cooperatives classified as farm marketing and farm supply had 39 and 39.2 percent, respectively.

Net Margins

Total net margins for all cooperatives in 1982 were more than \$854 million, including intercooperative dividends and refunds of \$294 million.⁷ This was down 40.7 percent from 1981 net margins of \$1.4 billion. Intercooperative dividends were down 47.3 percent from 1981 dividends of \$558 million.

⁷Net margins include cooperatives' net earnings and net losses.

Table 10—Farmer cooperative net margins¹ by principal products marketed and major function, 1982

Principal products marketed and major function	Total net margins	Margins from own operations	Margins from other cooperatives
<i>1,000 dollars</i>			
Products marketed:			
Cotton and cotton products	113,994	93,859	20,135
Dairy products	184,742	171,076	13,666
Fruits & vegetables	44,031	40,292	3,739
Grain, soybeans, and soybean meal & oil	276,484	179,242	97,242
Livestock, wool, and products	6,314	5,958	356
Poultry products	9,365	9,000	365
Rice	12,454	11,416	1,038
Sugar products	22,525	22,310	215
Other products ²	14,473	13,924	549
Total farm products	684,382	547,077	137,305
Total farm supplies	163,728	7,031	156,697
Total related services	6,206	6,158	48
Combined total	854,316	560,266	294,050

¹Cooperatives operating on a pooling basis are not included.

²Includes dry edible beans and peas, nuts, tobacco, and miscellaneous products.

Marketing cooperatives' net margins (\$684 million) were 11.7 percent below the \$775 million generated in 1981 (table 10). Also, marketing cooperatives' net margins accounted for 80.1 percent of total net margins and 0.9 percent of gross sales volume. Total net margins for marketing cooperatives whose principal products were grain, soybeans, and soybean meal and oil decreased 28 percent from 1981 but maintained the largest percent of marketing cooperative net margins in both 1982 (40.4 percent) and 1981 (49.5 percent).

Farm supply cooperatives' total net margins (\$164 million) dropped severely from the \$657 million in 1981—a decrease of 75.1 percent. In 1981, farm supply cooperatives generated 45.6 percent of cooperatives' total net margins compared to only 19.2 percent in 1982. The largest drop in net margins generated by farm supply cooperatives came from their own operations—from \$386 million in 1981 to \$7 million in 1982. The

decline in net margins is mainly due to large losses incurred by several of the larger cooperatives.

Farmer cooperatives' net margins from their operations in 1982 totaled \$560 million—down 36.5 percent from \$882 million reported in 1981. Almost 34.4 percent, or \$294 million, of total net margins were generated from other cooperatives, compared with 38.8 percent in 1981. Marketing cooperatives' net margins from other cooperatives decreased to 20.1 percent of the total in 1982 from 36.9 percent in 1981. Nearly 35.2 percent of the net margins generated by grain cooperatives came from other cooperatives.

Other Service Organizations

Other types of service cooperatives or organizations were operating in 1982 besides those directly related to marketing and farm supply purchasing. Additional statistical data are shown in table 11.

Federal Land Bank Associations

Federal land bank associations totaled 476 and operated throughout the United States and the associated Commonwealth of Puerto Rico with nearly 668,000 memberships. Texas led all States, with 11.6 percent of the total number of associations and 6 percent of total members. Wyoming ranked first with 11.6 percent of total loans made, and California second with 8.2 percent. The associations made loans of more than \$8.5 billion to farm members.

Production Credit Associations

Production credit associations, totaling 421, made loans of more than \$32.8 billion to 501,608 stockholders.

Texas was the leader again with 7.1 percent of total associations. North Carolina led in number of stockholders with 8.1 percent of the total, while California again led in loans made with 9.9 percent.

Banks for Cooperatives

Thirteen banks for cooperatives made loans of more than \$23.3 bil-

lion to 3,050 agriculturally oriented member cooperatives.

Minnesota again led all States with 10.6 percent of total members; Iowa was second with nearly 9.3 percent. However, California was the leader in loans made, with 15 percent of the total.

Rural Credit Unions

Rural credit unions numbered 1,046 with 2,458,421 members holding share savings of more than \$3.6 billion in 1982.

Wisconsin led all States in number of associations with 11.2 percent of total, while California led in members with 22.2 percent of the total and in share savings with 24.1 percent of the total.

Rural Electric Cooperatives

Rural electric cooperatives, totaling 926, reported 9.3 million consumer members and revenue of more than \$13.6 billion.

Texas led all States, with 8.6 percent of total associations, 9.3 percent of total consumer memberships, and 7.7 percent of total revenue.

Rural Telephone Cooperatives

Rural telephone cooperatives, totaling 255, with revenues of more than \$455 million, had 973,864 subscriber members. These cooperatives were all financed by the Rural Electrification Administration (REA).

Iowa had the largest number of cooperatives (14.5 percent of the total), while Texas accounted for more subscriber memberships (8.8 percent) and revenue (11.4 percent) than any other State.

Dairy Herd Improvement Associations

Dairy herd improvement associations totaled 1,051. Memberships numbered 40,841, and cows tested totaled nearly 3.4 million.

Minnesota accounted for 74, or 7 percent, of the total number of associations. New York (3,057), Pennsylvania (3,978), Minnesota (4,741), and Wisconsin (6,305), combined accounted for 44.3 percent of total members. Nearly 508,000, or more than 14.9 percent of the cows tested, were in California.

²Farm Credit Administration.

³Listed by location of cooperative headquarters.

⁴Served by PCA in Connecticut.

⁵Credit Union National Association, Inc. (Includes federally chartered and State-chartered credit unions.)

⁶Rural Electrification Administration, USDA.

⁷Agricultural Research Service, USDA.

⁸Official DHI (includes Dairy Herd Improvement Registry).

U.S. Department of Agriculture Agricultural Cooperative Service

Agricultural Cooperative Service provides research, management, and educational assistance to cooperatives to strengthen the economic position of farmers and other rural residents. It works directly with cooperative leaders and Federal and State agencies to improve organization, leadership, and operation of cooperatives and to give guidance to further development.

The agency (1) helps farmers and other rural residents obtain supplies and services at lower costs and to get better prices for products they sell; (2) advises rural residents on developing existing resources through cooperative action to enhance rural living; (3) helps cooperatives improve services and operating efficiency; (4) informs members, directors, employees, and the public on how cooperatives work and benefit their members and their communities; and (5) encourages international cooperative programs.

The agency publishes research and educational materials, and issues *Farmer Cooperatives*. All programs and activities are conducted on a nondiscriminatory basis, without regard to race, creed, color, sex, or national origin.
